

ALL YOU NEED TO KNOW ABOUT OUR COTTON JERSEY

- 95% COTTON 5% SPANDEX
- 200GSM
- 150CM WIDE

Our cotton jersey is a knit fabric with a touch of spandex that gives the fabric excellent stretch qualities. It is comfortable, soft and stretchy with great drape, and suitable for a wide variety of sewing projects including t-shirts, dresses, pants and tops. The fabric's breathability and ability to hold its shape make it a favored option for casual, comfortable garments and the ideal choice for active wear.

To sew jersey use a 75/11 or 80/12 ballpoint needle and a polyester thread. A stretch or zigzag stitch will maintain flexibility.

Prewash cotton jersey to avoid shrinkage. Wash in cool or cold water with a mild detergent and dry naturally or with low heat.
